

Would You Rather Be a FISH?

from *National Geographic Kids*

National Geographic Kids asked scientist Zeb Hogan about his work, his heroes—and what kind of fish he would like to be!

NG Kids: What's a normal day like for you?

Hogan: When I am **in the field**, I spend almost all of my time on or near the water. In Southeast Asia, I rely on fishers to help gather the information that I need. We own a small boat and take it along the river to meet with as many fishers as possible. If the fishers catch an endangered fish, we work with them to get the fish tagged and released back into the water. I also interview all the fishers that I meet to ask them about their catches and the abundance of endangered species.

Would You Rather Be a FISH?

from *National Geographic Kids*

In Mongolia, we work with recreational fishers to gather information about the ecology of the world's largest trout. In a typical day, we wake up at 7 a.m., go out on the river about 9 a.m., spend the day tagging and releasing fish, return to camp at 6 p.m., clean up, and eat.
