

# Pioneer of Women's Rights

by Frank Lee

In July 1920, Harry T. Burn, a state representative in Tennessee, cast the vote that passed the Nineteenth Amendment. The amendment gave women the right to vote in national elections. But the battle for this right began more than seventy years before—at a women's rights convention.

In 1848, Elizabeth Cady Stanton attended the Seneca Falls Convention, the first convention for women's rights in the United States. Stanton and others presented a document for women's rights, modeled after the Declaration of Independence. A key demand was the right to vote. With that right, women could change unfair laws such as the ones that limited their educational opportunities. The campaign for women's right to vote had started.

# The Susan B. Anthony Amendment

by Judy Diaz

Susan B. Anthony was an activist by nature and worked for many causes. She was among many Americans who wanted to end slavery. She was also part of a far smaller group that wanted to improve the lives of American women. Women had many obstacles to gaining their rights.

At the time, most women could not own property, weren't paid the same as men for the same labor, and could not vote. Anthony knew that with the right to vote, women would have the ability to change the laws. Achieving suffrage, or the right to vote, for women was the key. It became her lifelong goal, but its outcome would not be revealed until after her death.
