

Making Bucks by Washing Pups

by Mai Nguyen

Do you love dogs? If so, consider starting a dog washing business. To be successful, begin with a plan that includes where you will wash the dogs. Then think about the materials you will need, such as shampoo, hoses, towels, and a tub. Also list who you think your customers might be.

Next, do the numbers. Add up all your costs and decide how many customers you might get each week. Figure out what you should charge to begin making a profit within three months.

Show your detailed plan to your parent(s), and explain your goals. Then, if they give permission, get (and take!) their advice.

Highlight words and phrases that provide clues to the text structure.

▲ Washing dogs can be fun and profitable.

Maddie's FishFlops

by Amit Sinha

Because Maddie Robinson loved sketching sea creatures at the beach, it was no surprise when, one day, she sketched a flip-flop design with sea animals on it. She named it a FishFlop.

Maddie's father saw the business possibilities right away. He registered for the FishFlops.com domain name and talked with a lawyer about getting a trademark.

Since Maddie and her father wanted people to see the product, they began making samples and taking them to trade shows. Customers began to flip for FishFlops, and the business grew!
